Guidelines for Teachers

Welcome to the **Disaster Preparedness and Response Education System**.
This section will help you understand how to use the web app effectively and guide your students in learning essential disaster management skills.

1. Getting Started

- Use the login credentials provided by your school admin to access the app.
- Once logged in, select **"Teacher Dashboard"** to view your resources.
- Ensure your profile information is updated.

2. Understanding the Dashboard

- **Learning Modules Overview** – Preview the student content (earthquake, flood, fire, etc.).
- **Virtual Drills** – Guidelines to conduct online/offline practice drills.
- **Student Reports** – Track student participation, badges earned, and quiz scores.
- **Help & Support** – Access FAQs and troubleshooting guides.

3. Your Role as a Teacher

- **Introduce the App**: Explain to students the importance of disaster preparedness and how to use the app.
- **Facilitate Learning**: Encourage students to complete modules and participate in games.
- **Monitor Engagement**: Use your dashboard to see which students are active and which need motivation.
- **Reinforce Knowledge**: Discuss key learnings from the modules during classroom sessions.

4. Conducting Drills

- **Before the Drill**: Brief students about the drill objective (e.g., earthquake evacuation).
- **During the Drill**: Supervise and ensure students follow safety steps shown in the app.
- **After the Drill**: Collect student feedback and update the report section in your dashboard.

5. Gamified Learning

- Inform students about the **badge system** (e.g., Flood Ready, Fire Smart).
- Motivate them to earn badges by completing modules and quizzes.
- Recognize top performers in class to encourage healthy competition.

6. Communication & Feedback

- Share progress updates with your school admin regularly.
- Report any technical issues via the **Support tab**.
- Provide feedback on the modules or drills to help us improve the app.

7. Best Practices

- Dedicate at least **15–20 minutes weekly** for disaster education using the app.
- Encourage students to share their learning with peers and families.
- Foster a positive and engaging environment – make preparedness fun as well as educational.

■ By following these guidelines, you will empower students to be more prepared, resilient, and confident in responding to disasters.
